

BLOCKS **FOR CONTAINERS, TRAYS AND POTS**

Stable coco coir, the perfect substrate, the perfect additive

ADD MAXIMUM VALUE TO YOUR POTTING SOIL MIXTURES

With more than 25 years of expertise and experience, Dutch Plantin is market leader in production of coco coir for potting soil producers. With 15 production sites in India, Africa and The Netherlands, Dutch Plantin is the largest producer of coco coir for horticultural purpose worldwide.

ADD MAXIMUM VALUE TO YOUR POTTING SOIL MIXTURES

The entire process is 100% controlled, from sourcing and processing of the raw materials up to sales and delivery to the customer.

- **100% ORGANIC ADDITIVE AND VERY UNIFORM** – easy to mix homogeneously with your potting soil
- **LOW VOLUME TO STORE** – blocks are compressed to transport larger volumes and thereby there is no packaging needed
- **LOW EC LEVELS** at our Indian sites we produce washed coco pith at EC < 0,5 mS/cm in 1:5
- **RELEVANT CERTIFICATES** are available, e.g. our washed coir can be certified for 'Organic' and our buffered blocks are RHP certified
- **RELIABLE DELIVERIES** by large volumes in stock and good agreements with the liners

BLOCKS OF 5 KG

COCO PITH

- Unique characteristics, excellent water/air ratio
- Possible in buffered quality

COCO CHIPS

- A great additive to increase air-ratio and stability
- Mixtures of washed pith and chips

COCO-15

- A unique coco fiber, perfect to mix with peatmoss and others

BRIQUETTES OF WASHED PITH

- 650 gr standard 8 ENltr (approx 20x10 cm)
- Square 14x14 cm 6 - 8 ENltr
- Special sizes on request (minimum is full container)

A balanced aging makes the difference

We are not afraid to distinguish ourselves by only processing 'aged' coco in our growbags, blocks and briquettes. It may be more labour-intensive and time-consuming, but we consciously chose to adopt this production method. Why, you ask? Simply because it enables us to provide our customers with a guaranteed stable product for excellent crop growth, even long-term.

Available in:

- 40ft HC containers with maximum 24 Mtons palletized or 26 Mtons floor loaded
- 20ft container with 10-11 Mtons

Used coir is very well to reuse for other crops or for soil improvement.

CONTACT

Keen to find out more about our coco substrates? Or about the benefits of our products for your crops and the environment? Contact us today! Phone +91 422 256 2501 (India) or +31 492 747 560 (The Netherlands) or send us a message through our contact form on our website. We will get back to you as soon as possible.
