

## GROWBAGS

### SLABS AND OPENTOPBAGS

*Stable coco coir, the perfect substrate, the perfect growbag*

- custom made growbags direct from own factories
- stable qualities only for long lasting high air %
- easy to buffer & wash by low EC, Na & CI
- large saving on water consumption compared to growing in soil
- reliable deliveries according our agreement

# DURABLE GROWBAGS FOR GROWING VEGETABLES, FLOWERS AND SOFT FRUITS:

## SLABS

- **Premium** Double Layer: coco pith on top + coco chips on bottom (variable %)
  - **Optima** Mixture: coco pith + coco chips (variable %)
  - **Classic** 100% coco pith
- Sizes** 90-100-120-200 cm length  
12-15-18-20 cm wide  
8-16 cm high

## OPTIMA OPEN TOP

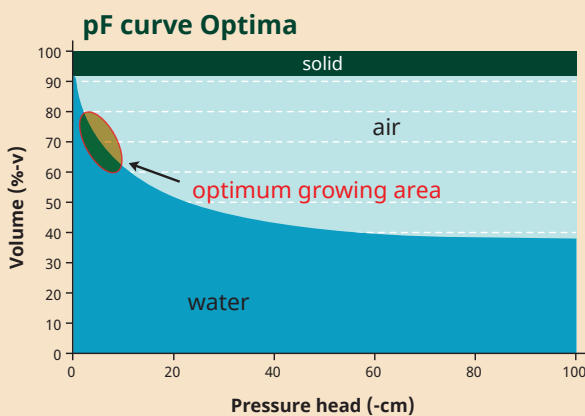

- **special blend of stable pith & premium chips (variable %)**
- Sizes:** from 20x20 cm up to 33x30 cm and heights from 15 to 28 cm (from 6 to 25 ltr)

### QUALITIES

EC levels from EC 0,5 to 1,8 mS/cm (in 1:5 dilution) depending on the product

# The choice for growing successfully

- fast taking of the crop
- great horizontal rooting
- optimum moisture content
- no wet roots anymore

### R&D research proves emission-free growing is feasible with our:

- 'not washed' quality for growing tomatoes
- 'buffered-RHP' quality for strawberries
- 'washed' quality for the other vegetables and other soft fruits

### A BALANCED AGING MAKES THE DIFFERENCE

We are not afraid to distinguish ourselves by only processing 'aged' coco in our growbags, blocks and briquettes. It may be more labour-intensive and time-consuming, but we consciously chose to adopt this production method. Why, you ask? Simply because it enables us to provide our customers with a guaranteed stable product for excellent crop growth, even long-term.

Available in:

- 40ft HC containers with up to 40.000 pieces
- 20ft container with up to 18.000 pieces

**Used coir is very well to reuse for other crops or for soil improvement.**

## CONTACT

Keen to find out more about our coco substrates? Or about the benefits of our products for your crops and the environment? Contact us today! Phone +91 422 256 2501 (India) or +31 492 747 560 (The Netherlands) or send us a message through our contact form on our website. We will get back to you as soon as possible.
